Course Equivalency Guide for Oregon State Schools

These courses are not required for all programs.

Please see footnotes to determine if the course is a prerequisite requirement for your program of interest.

Note: This is not an all-inclusive list; if you have courses in question, please email proginfo@ohsu.edu.

¹Bachelor of Science with a major in nursing standard program prerequisite.

² Accelerated B.S. program prerequisite.

³ Accelerated B.S. to DNP or PhD program prerequisite.

⁴Traditional Non-OCNE RNBS program for current RNs.

⁵ English Writing: 6 quarter credits are required as prerequisites; however, you will need to take 8 quarter credits to meet the writing requirement for graduation. Most students complete both the prerequisite and the graduation requirement by taking two 4-credit classes; but you could take 6 credits before entry and later take an additional 2 or more credits. If you mix courses from different schools, please make sure that you convert any semester hours to quarters and that you do not duplicate content. For instance, if you take WR 121 (or its equivalent) at two different schools, only one will count toward the 8 credits.

⁶ Doctor of Nursing Practice programs (excluding Post-Master's DNP).

⁷ This requirement may not be met through a Microbiology or Anatomy & Physiology course.

⁸ This course MAY meet the OHSU nutrition requirement depending on content coverage as indicated in your syllabus from the course. OHSU will only review a syllabus from the term during which you took the course to determine acceptability.

⁹ One class of FRINQ and SINQ from PSU is the equivalent of 4 credits of English Composition coursework.

*Please review your options with the advisor at the school you are attending.

Please note: This table is only a guide and is not an official document. Final decisions regarding the acceptance of prerequisites are made by the OHSU Registrar. This table was last updated on: 11/9/2022. Curriculum and/or course changes may have occurred since that date. Students who matriculated in prior years may be eligible for prior year transfer matrixes.

For most current information, please visit our Admissions and Prospective Students webpage or call 503-494-7725.

Reminder: Please also make sure to pay close attention to the amount of credits offered for each of your courses. If you mix courses from multiple schools, please make sure that you convert semester/quarter grades, that you count the total amount of credits between both schools, and that you pay attention to which class you are taking and where. For instance, do not take two WR 121's or its equivalent at 4 credits each—you would need to take two different courses to complete all levels of the series.

Course Equivalency Guide for Oregon State Schools

These courses are not required for all programs.

Please see footnotes to determine if the course is a prerequisite requirement for your program of interest.

Note: This is not an all-inclusive list; if you have courses in question, please email proginfo@ohsu.edu.

Non-Nursing Course Descriptions for OHSU SoN Programs

Note: All coursework must be taken from a regionally accredited institution, taken for a grade (rather than pass/no pass), and be undergraduate college-level to meet the OHSU requirement. Minimum grade requirements for each program must also be met. All science prerequisite courses need to be completed within 7 years* prior to the program start date. Science prerequisites include Anatomy & Physiology, Nutrition, Microbiology, Intro to Human Genetics, and Statistics. *Statistics must be completed within 5 years prior to the program start date for the ABSN to DNP/PhD programs and the post-Bacc programs (MSN, DNP, PhD).

Anatomy and Physiology with lab: A full sequence of human anatomy and physiology with laboratory, inclusive of all body systems. This sequence must be taken in its entirety. A&P can only be retaken once within 7 years prior to matriculation. If you have retaken an A&P course more than once, your 2nd grade will be used.

Microbiology with lab: Basic microbiology with laboratory component. If a course in microbiology with laboratory is available for only 3 quarter credits, then this will be accepted.

Nutrition: Course should cover biological functions, dietary sources of essential nutrients, and the relationship of diet to health.

Intermediate Algebra/Math 95 or higher competency: Competency for Intermediate Algebra or above must be demonstrated prior to application to the nursing program. Minimum requirements include coverage of addition, subtraction, multiplication, and division of rational expressions, long division of polynomials, solution of fractional equations, applications involving linear equations, fractional equations, inequalities, literal equations, variations, negative and fractional exponents, radicals, solution of quadratic equations, and complex numbers, Cartesian coordinates, graphs of linear equations and inequalities, distance formula, slope, equations of lines, and solutions of systems of linear equations in two unknowns and inequalities. Competency may be demonstrated by a math placement test or by successful completion of Intermediate Algebra or higher.

Note: Math 95 credits and any credits that are not college level are not applicable to credits for the Bachelor's degree; however, math courses that are 100 or higher may be included in the credits that are applied to the prerequisite requirement and to the degree. The student is advised to consider taking the prerequisite for Statistics in choosing a math course, which is required later in the nursing program.

Human Lifespan Development: Course should cover the social and psychological developmental process of human life covering the <u>lifespan</u> (birth through death). Courses that include only infancy or through school age will not suffice. This course is typically from the Psychology department.

Written English/English Composition: Met by a two- or three- course series focused on developing skills in academic writing. The following courses taught at Oregon community colleges meet the writing requirement: WR 121 and 122 at 4 credits each, or WR 121, 122, and 123 at 3 credits each. This requirement is automatically fulfilled for students with a previous bachelor's degree or an AAOT.

Note: Remedial English such as sentence structure and grammar will not be accepted for this requirement. For the Bachelor of Science with a major in nursing standard program, 6 quarter prerequisite credits are not required if a previous baccalaureate degree is held.

Intro to Genetics (a course or a module within a course): Any human biology course that includes a human genetics component in the course and indicates this inclusion in the college catalog course description. This requirement may not be met through a Microbiology or Anatomy & Physiology course.

Statistics: Course needs to include both descriptive and inferential components. If there is a choice between one type and another, then take the descriptive. It is not necessary to take two courses in order to get inferential statistics. Statistics may be taken in any department* (e.g. Math, Psychology, Business, etc.). If applying to the 3 Year program, statistics **must** be taken in a math department (e.g. Math, Statistics, etc.). The course description must indicate that Algebra is a prerequisite for the course.

Social Science Electives: Courses can be from any of the following departments: Anthropology, Economics, History, Political Science, Psychology, Sociology, Business, Government, Family Human Services, and Criminology. Selection of these electives may serve as a foundation for a focused area of study.

Humanities Electives: Courses can be from any of the following departments: History of Art, Art Appreciation, History of Music, Music Appreciation, English Literature, Linguistics, Philosophy, Religion, Speech and Theatre Arts, Foreign Language, Women's Studies, and Communications. Selection of these electives may serve as a foundation for a focused area of study.

Required Competency:

Basic Computer Literacy: College credit work and/or life experience can meet this competency. Students need proficiency in using email, internet searching, word processing, and file management.
