*** If Organic Chemistry students pass a national exam, the Organic Chemistry course will be upgraded by UO and OSU to a 300 level course, which is preferred by medical schools.

Advising Notes	This flightpath was designed for best alignment for two years of study. Many students will not enter UCC prepared to begin the flightpath unless they have taken Math and Chemistry coursework during the previous summer. As a result, their plan will need adjustment and may take longer than 2 years to be ready to transfer to the university or college of their choice. Most medical schools require Calculus, however, OHSU medical school requires Statistics.
